4 実験結果および検討

A grid consisting of 4 rows and 15 columns of small squares, totaling 60 squares.

$$S = \frac{B}{8 \times \lambda \times L} \quad (3)$$

A large grid of 100 small squares, arranged in 10 rows and 10 columns, intended for drawing a picture.

A grid of squares arranged in 10 rows and 20 columns. The first 9 rows are complete, each containing 20 squares. The 10th row contains 15 squares, leaving 5 empty spaces at the end of the row.

A 10x10 grid of squares. The first 9 rows are complete, each containing 10 squares. The 10th row contains only 5 squares, starting from the left.

5 まとめ

A 10x10 grid of squares. The first 9 rows are complete, each containing 10 squares. The 10th (bottom) row contains 7 squares, starting from the left and leaving 3 empty spaces on the right.

A 15x15 grid of squares. The bottom row contains 14 squares, while all other rows contain 15 squares.
